## Rubber Glass Bumpers

By: Tom Endy

Taken From: <https://www.santaanitaas.org/wp-content/uploads/2020/09/Victoria-window-rubber-glass-bumpers.pdf>

The Model A Ford Victoria and the A-400 incorporate two rubber bumpers in the door windows that are unique to these two body styles. The slant window town sedan does not use them. For that reason, Model A suppliers do not carry them.

However, Ford continued them in the design of the 1932-1935 Fords. Therefore, many V8-Ford suppliers do carry them. There are two slots that the bumpers fit into. One is located in the center of the bottom edge of the garnish molding. The other is located in the outer doorframe. Both slots are about one inch long and slightly less than 1\4" wide. The bumper's purpose is to rub against the glass on both sides to prevent the glass from rubbing on the metal garnish and doorframe. There is a pair of bumpers in each door.

### The 1932-1935 part numbers:

The bumper that fits into the garnish molding is part number B-46044. (stock number [B-7021444](#)) The bumper that fits into the doorframe is part number B-45380. (stock number [B-7021452](#)). Each has a slightly different shape from the other. Both bumpers are shown in the sketch below.

One such supplier that has stocked the bumpers in the past is [C&G Early Ford Parts](#) in Escondido, CA 760-740- 2400. They are carried under the stock number. The price is next to nothing.

## 2021 May Tour - Lunken to Ripley

By: Jarrod Williams

On Sunday, May 23, Jarrod and Melissa Williams led the May tour. The 107 mile tour left Lunken Airport at 10:00 a.m with 6 Model A's and one modern car. The tour drove to Ripley, OH to visit the historic Rankin House. The tour crossed the Ohio River on the Augusta ferry. All Model A's were carried on the same ferry ride (to Debbie Arnold's delight). Once in Augusta Kentucky, the tour enjoyed lunch at the Augusta Pub. After lunch members had time to enjoy a walk around the picturesque town and enjoy ice cream. Tom Blomer received a toilet seat award (awarded at the May meeting) for having a minor hiccup with his fuel filter on the return trip which followed the Ohio River on the Kentucky side. The weather was perfect and we hope to see more Model A's attend the rest of the 2021 tours.

## Jabots and Bertha Collars Add Era Flair to Modern Dresses

By Laurie Elliott, Santa Clara Valley Chapter

Taken from: [https://www.mafca.com/downloads/Fashions/Articles/Jabots\\_and\\_Bertha\\_Collars\\_2021-01.pdf](https://www.mafca.com/downloads/Fashions/Articles/Jabots_and_Bertha_Collars_2021-01.pdf)

When looking at women's afternoon and evening wear of the Model A era, you'll notice all sorts of drapes, flounces, ruffles, ties and streamers that you generally don't see in modern clothing. This can be a bit perplexing when trying to recreate an era look. How do you achieve this without the work of sewing an entire garment? Try adding a jabot or bertha collar to your modern dress.

Jabots As defined by the MAFCA Fashion Guidelines, "Jabot (zha-boe)': A pleated frill of lace or cloth attached down the front of a woman's blouse or dress." Historically, men have worn jabots for a few hundred years before being adopted by women in the early 19th century. Jabots were popular during the Model A era and well beyond, for spiffing up an afternoon or evening blouse or dress.

A rule of thumb is the jabot is at least as nice as the fabric in the main garment. It is an embellishing flourish.

Some jabots were sewn to the neckline or collar of a dress, while others were separate pieces pinned to the neckline, usually, but not always at the center. Jabots could be made of the same fabric as the garment, and could be printed or solid material. Whether they were streamlined or heavily ruffled, jabots were usually angular, often coming to a point at the bottom.

Below left is a dress from the Montgomery Ward Catalog Fall/Winter 1929 – 30, with a very fancy lace collar and matching jabot. In the photograph below right are a couple of my estate sale finds. The fancy lace jabot looks similar to the one on the red dress, but is probably earlier than the Model A years of 1928 – 1931. It is completely hand made and unlikely to have been made for mass purchase.

The jabot with the cameo pin is also hand made, but is more modern looking. Many jabots look like fancy handkerchiefs folded and pinned to the bodice front. Before you pin, remember that pins leave holes that often cannot be repaired.

### Bertha Collars

Bertha collars, also known as "cape collars," are cape like overlays that attach at a dress's neckline and extend over the shoulders. Often of voile, organdie, lightweight silk or very sheer cotton, bertha collars add a flutter of movement to an afternoon or evening frock. Sleeveless dresses often had bertha collars that gave them, "the satisfactory feeling of sleeves without any of their discomfort for warm days," according to *Modern Pricilla*, July 1929. In other words, the wearer gets to hide some skin in comfort and add a bit of graceful movement. Here are some dresses with bertha or cape collars from the MAFCA Fashion Guidelines with a variety of hem treatments. Bertha collars weren't limited to sleeveless dresses as shown in the

dress below right, from Montgomery Ward Catalog, F/W 1929-30. Nor were the necklines of bertha collars always symmetrical as in below left, from *Modern Pricilla*, 1929. The next time you want to amp up your modern dress for a Model A banquet or afternoon tea, try adding a fancy jabot or bertha collar and get ready to receive compliments.
